SKILLS

PROGRAMMING
• PostgreSQL • Python
• DAX • R

Certifications:
• Microsoft Certified: Power BI Data Analyst Associate (March 28, 2024-March 28, 2025)
• Blackbaud Certified in Raisers Edge CRM
• DataCamp Data Analyst with Power Bi
• DataCamp Data Analyst with R

Libraries:
• Python Libraries: Pandas, Seaborn, Matplotlib
• R Libraries: dplyr, ggplot2

TOOLS
• Power BI • Anaconda
• Docker • Ms Excel • Raisers Edge
• Google Suite

SUMMARY

Early-career Data Scientist with four years of experience analyzing membership data using Power BI, managing SQL and web servers for an e-commerce platform, and bridging the gap between stakeholders and technology. Skilled at translating stakeholder needs into data-driven solutions through effective data transformation and visualization, enhancing decision-making and streamlining workflows.

EXPERIENCE

UNITED WOMEN IN FAITH IT Systems Manager
May 2020 - Febuary 2024 | New York, NY
- I created reports and dashboards in Power BI to showcase insights on membership, using data collected from surveys I designed with input from stakeholders across all departments. Data was transformed with DAX and Power Query to ensure clarity and impact in the annual reports.
- I managed the back-end of an e-commerce website for jewelry and pins, where I wrote SQL queries to identify orders that failed to send to ShipStation during an API disruption. Using a LEFT JOIN, I compared sent orders with shipped orders to find unmatched entries, allowing me to pinpoint and resend unprocessed orders.
- Led cross-departmental projects that centralized information, streamlined workflows, and improved organizational efficiency. I have acted as the primary point of contact between internal teams and third-party contractors, managed project scopes and risks, and facilitated requirements gathering and training sessions
- Provided ad hoc data analysis reports of data collected from events and donor data from specific Conferences/Districts

COLLEGE ADVANCEMENT | CRM and Database Fellow
November 2016 – Jun 2018 | Olympia, WA
- Created and maintained detailed reports and dashboards to track fundraising progress and donor engagement, providing actionable insights to the development team.
- Managed and maintained the Raiser's Edge CRM system, ensuring accurate donor records and gift processing.
- Collaborated with the development team to strategize and enhance donor stewardship efforts, leading to a significant increase in alumni participation.
- Implemented automated workflows within the Raiser's Edge CRM using third party software

THURSTON COUNTY AUDITORS OFFICE | Thurston Votes Intern
Feb 2015 – June 2016 | Olympia, WA
- Created an Android/iOS web application using the Meteor Framework.
- Provided more accessibility to voting documents using HTML5.
